## DIAGNOSIS

(A) TOTAL THYROIDECTOMY:  
 PAPILLARY THYROID CARCINOMA, CONVENTIONAL TYPE

Location: Right lobe  
 Multi-focal: No  
 Size = 1.6 cm  
 Extrathyroidal extension: Absent  
 Lymphovascular invasion: Absent  
 Resection Margins: Negative  
 Background Thyroid: Focal chronic lymphocytic thyroiditis  
 Lymph nodes: No tumor present in one lymph node (0/1)

ICD-0.3  
 carcinoma, papillary, thyroid 8260/3  
 Site: thyroid, NOS C73.9  
 ju

## GROSS DESCRIPTION

(A) TOTAL THYROIDECTOMY, STITCH RIGHT LOBE - The specimen consists of a thyroid with a right thyroid lobe (5.8 x 2.3 x 2.2 cm), left thyroid lobe (4.7 x 2.0 x 1.9 cm) and an isthmus (1.7 x 1.5 x 0.4 cm). The outer surface is tan-red, smooth with no grossly identifiable lesion.

The specimen is serially sectioned. There is a tan-pink, hemorrhagic soft, fairly well-circumscribed nodule located in the mid portion of the right lobe (1.6 x 1.5 x 0.6 cm) approximately 0.2 cm from the closest margin. There is also a firm, well-circumscribed smaller nodule located in the superior portion of the right thyroid lobe (0.6 x 0.5 x 0.3 cm). The remaining portion of the thyroid is grossly unremarkable.

SECTION CODE: A1-A8, the right thyroid lobe, submitted from superior towards inferior aspect (A1 contains the smaller nodule in the superior aspect; A3-A6, contain the larger nodule in the mid portion of the right lobe); A9, A10, isthmus, submitted from right towards left; A11-A13, representative sections of the left thyroid lobe submitted from superior towards inferior aspect. A portion of normal thyroid and the lesion was submitted to tumor tissue bank for research.

## CLINICAL HISTORY

Papillary thyroid carcinoma.

## SNOMED CODES

T-B6000, M-80503,
