

DIAGNOSIS:

RIGHT ALVEOLECTOMY:

SQUAMOUS CARCINOMA FOCALLY INVADING INTO BONE; BONE MARGINS OF RESECTION FREE OF TUMOR.

(E) RIGHT INFERIOR TURBINATE:

Bone segments with attached mucosal and submucosal tissue; no tumor present.

COMMENT: This supplemental report is issued to give the diagnoses on specimens requiring decalcification. This report does not change any of the diagnoses given on the previous report.

SUPPLEMENTAL REPORT

DIAGNOSIS:

(A) RIGHT ALVEOLECTOMY:

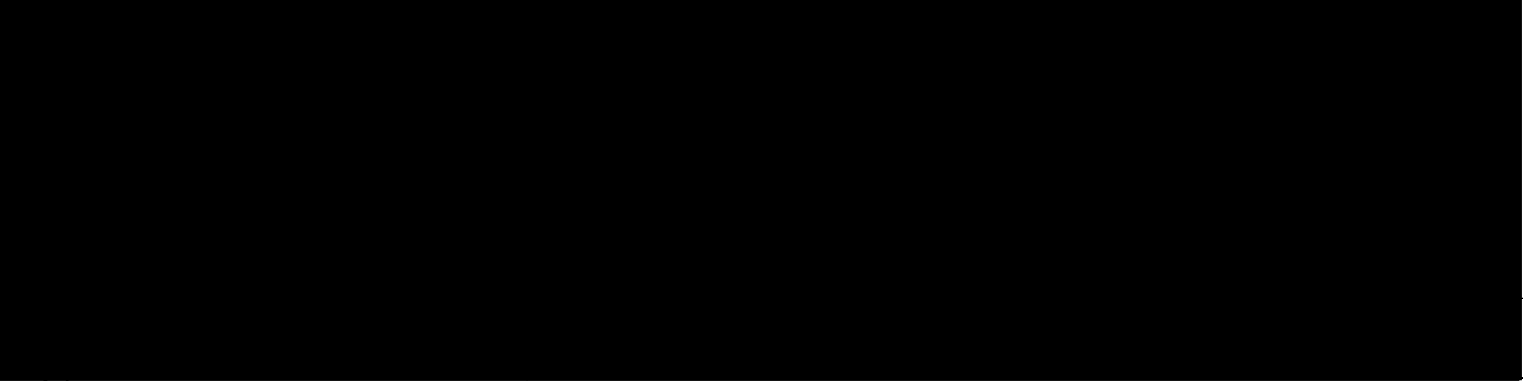

SQUAMOUS CARCINOMA FOCALLY INVADING INTO BONE; BONE MARGINS OF RESECTION OF TUMOR.

(E) RIGHT INFERIOR TURBINATE:

Bone segments with attached mucosal and submucosal tissue, no tumor present.

COMMENT: This supplemental report is issued to give the diagnoses on specimens requiring decalcification. This report does not change any of the diagnoses given on the previous report.

DIAGNOSIS

- 
- (A) RIGHT ALVEOLECTOMY:
INVASIVE WELL-DIFFERENTIATED SQUAMOUS CARCINOMA.
 - (B) INFERIOR ANTERIOR MARGIN:
Squamous mucosa with mild to moderate dysplasia, no tumor present.
 - (C) BUCCAL MARGIN:
Mild to moderate squamous dysplasia.
 - (D) NASAL FLOOR MUCOSA:
Respiratory mucosa, no tumor present.
 - (E) RIGHT INFERIOR TURBINATE:
Pending decalcification.
 - (F) MAXILLARY SINUS MUCOSA:
Respiratory mucosa, no tumor present.
 - (G) TOOTH:
Single tooth, gross only.
- 

SPECIMEN

- (A) RIGHT ALVEOLECTOMY:
- (B) INFERIOR ANTERIOR MARGIN:
- (C) BUCCAL MARGIN:
- (D) NASAL FLOOR MUCOSA:
- (E) RIGHT INFERIOR TURBINATE:
- (F) MAXILLARY SINUS MUCOSA:
- (G) TOOTH:
