**GROSS**

Submitted for review by Dr. [REDACTED] is one (1) slide labelled  
accompanied by a corresponding pathology report. The  
material originates from [REDACTED]

**COMMENT**

The histologic examination of the cervical biopsy shows different  
sized nodules composed of markedly enlarged squamous cells with a  
prominent nucleus. The nuclei is pleomorphic. Single-cell  
dyskeratosis on increased numbers of atypical mitoses are present.  
These findings correspond to a moderately differentiated squamous  
cell carcinoma. The stroma of the tumor shows moderate
