**Gross Description:**

---

1). The specimen is received fresh, labeled "prelaryngeal lymph node" and consists of a single firm lymph node measuring 0.7 x 0.5 x 0.3 cm. The lymph node is entirely submitted.

Summary of sections:

LN - lymph node

2). The specimen is received fresh, labeled "Total thyroid" and consists of a thyroid weighing 13.5 g. The right lobe measures 4.1 x 2.6 x 1.1 cm, the left lobe measures 4.2 x 2.5 x 1.8 cm and the isthmus measures 1.8 x 0.8 x 0.4 cm. The external surface is covered by a thin fibrous capsule. The posterior surface of the specimen is inked black, and the anterior is inked blue. Sectioning reveals a 0.9 x 0.8 x 0.6 cm well circumscribed pink tan papillary nodule located in the left lower lobe approaching into the isthmus. The central portion is submitted for TPS, remaining nodule is blocked out and submitted. Sections through the remaining tissue reveal otherwise red tan grossly unremarkable parenchyma. Representative sections are submitted.

Summary of sections:

N - nodule (left lower lobe and isthmus)

RL - right lobe

LL - left lobe

IS - isthmus
