## Surgical Pathology Report

Patient Name: [REDACTED]  
Med Rec No: [REDACTED]  
DOB: [REDACTED] (Age: [REDACTED])  
Gender: F  
Physician(s): [REDACTED]  
cc: [REDACTED]

Client: [REDACTED]  
Location: [REDACTED]  
Pt. Phone no: [REDACTED]

Taken: [REDACTED]  
Received: [REDACTED]  
Reported: [REDACTED]

History/Clinical Dx: Anemia, pelvic mass

Postoperative Dx: Pending pathology examination

Normal/Normal

ICD-0-3 coding N/A

Site: Endometrium C54.1  
w/ 5/2/12

Specimen(s) Received:  
Uterus and cervix

### DIAGNOSIS: Uterus and cervix:

1. Cervix with no pathologic abnormality
2. Disordered proliferative endometrium and endometrial polyp
3. Adenomyosis
3. Leiomyomata

### Gross Description

Received: In formalin is a single segment of previously opened, unoriented, soft tan tissue  
Labeled: "1 cervix, uterus"  
Weight: 330.0 gm  
Size: 12.0 x 8.9 x 8.0 cm  
Appearance:  
Serosal surface: Smooth, shiny, tan with prominent subserosal bulging; asymmetric  
Cervix: Smooth, shiny, with no lesions  
Endometrium: 0.2 cm, smooth, tan with areas of hemorrhage and mucoid material. There is a polyp, 0.4 x 0.3 x 0.3 cm. There is a possible tan, granular area, 0.6 x 0.4 x 0.1 cm.  
Myometrium: 4.3 cm, diffuse areas of adenomyosis, largest up to 4.0 x 3.5 x 2.0 cm  
Myomas  
Number: Multiple  
Size: Largest up to 6.2 x 5.0 x 5.0 cm  
Appearance: White with whorled cut surfaces, well-circumscribed, with no areas of hemorrhage, calcifications or necrosis.  
Other: None

### KEY TO CASSETTES:

- 1 - Cervix
- 2 - Lower uterine segment
- 3 - Polyp
- 4 - Endometrium, possible granular area described above

Preanalytical Submissions

Check for completeness of information and specimens submitted for analysis.
