GROSS DESCRIPTION

PART #1: RIGHT TONSIL MASS [REDACTED]

Resident Pathologist: [REDACTED]

Dictated by: [REDACTED]

The specimen is received fresh, labeled [REDACTED] and is
designated right tonsil mass. The specimen consists of 2 unoriented
of soft red-tan tissue, measuring 3.1 x 1.1 x 0.6 cm in aggregate.
The presumed cauterized resection margin is inked black. The larger
tissue piece is bisected and the specimen is entirely submitted.
