ICD-0-3

carcinoma, infiltrating ductal, nos 8500/3
 Site: breast, nos C50.9

Breast, left, wide local excision: Infiltrating ductal carcinoma, Nottingham grade II (of III), forming a multilobulated mass (1.5 x 1.2 x 1.0 cm) adjacent to the prior core biopsy site (AJCC pT1c). Ductal carcinoma in-situ, solid type, high nuclear grade, is present outside the main tumor mass. No angiolymphatic invasion is identified. The skin is without diagnostic abnormality. All surgical resection margins, after re-excision of the deep margin (skeletal muscle), are negative for tumor (minimum tumor free margin, 0.4 cm, superior margin).

Lymph nodes, left axillary, dissection: Multiple (3 of 25) left axillary lymph nodes are positive for metastatic carcinoma with extranodal extension (AJCC pN1). Two positive lymph nodes are matted together.

Her-2/NEU has been ordered on paraffin embedded tissue.
