## Surgical Pathology Report

Patient Name:

Med Rec No:

DOB:

Gender:

Physician(s):

cc:

Client:

Location:

Pt. Phone no

Accession #:

Taken:

Received:

Reported:

History/Clinical Dx: Adenocarcinoma

ICD - 0 - 3 not applicable.

Postoperative Dx: Same, pending pathology examination

Normal path from non-cancer patient.

fw n/a

### Specimen(s) Received:

Uterus, cervix, tubes and ovaries

### DIAGNOSIS:

Uterus, cervix, tubes and ovaries:

Cervix:	Focal residual severe glandular dysplasia, margins clear
Endometrium:	Atrophic
Myometrium:	Adenomyosis
Right ovary:	Benign serous inclusions
Right tube:	Unremarkable
Left ovary:	Benign serous inclusions
Left tube:	Unremarkable

### Gross Description

Received:

Uterus and cervix with bilateral adnexa in formalin

Labeled:

"uterus, cervix and bso"

Weight:

61 gms

Size

Uterus: 6.0 cm from the tip of the cervix to the top of fundus x 4.5 cm across the fundus laterally and 2.3 cm from anterior to posterior

Right ovary: 3.0 x 0.6 x 0.7 cm

Left ovary: 3.1 x 1.2 x 0.6 cm

Appearance

Serosal surface: Normal

Tumor: Not grossly evident

Cervix: Is covered by smooth pink-tan mucosa with irregular dark tan areas consistent with previous biopsy

Endometrium: Smooth and pink tan, pale tan 0.5 cm in greatest diameter, slightly raised area along the lower part of the posterior wall of the fundus

Right tube and ovary: Right tube has been previously sectioned and measures 1.5 cm in length proximal to the section and 2.0 cm in length distally. Appears otherwise normal. The right ovary is a 1.5 x 0.6 cm portion previously removed and otherwise appears normal.

## Surgical Pathology Report

[REDACTED]

Left tube and ovary: Left tube has been previously sectioned measures 3.0 cm in length proximal to the section and 1.0 cm in length distal. The left ovary is 0.9 x 0.4 cm portion previously removed and cut surface otherwise is unremarkable.

Lymph nodes: None grossly evident

Representative sections are submitted.

Key to cassettes:

- |   |   |  |
|---|---|--|
| 1 | - | Full thickness cervix from 12 o'clock to 3 o'clock                       |
| 2 | - | Cervix 3 o'clock to 6 o'clock  |
| 3 | - | Cervix 6 o'clock to 9 o'clock  |
| 4 | - | Cervix 9 o'clock to 12 o'clock   |
| 5 | - | Posterior wall of the uterus including endometrium/myometrium and serosa |
| 6 | - | Right ovary and fallopian tube   |
| 7 | - | Left ovary and fallopian tube  |

### Microscopic Description

The microscopic findings support the above diagnosis.
