

Procurement Date: Laterality: N/A

Path Report: Left lobe of thyroid, partial thyroidectomy:

- Histologic type: Papillary thyroid carcinoma, no special type.

- Tumor size: 2.3 cm (greatest dimension)

- Location: left lobe

- Multicentricity: Absent

- Extent of invasion:

- Capsular invasion: Absent

- Angiolymphatic invasion: Absent

- Extra-thyroid capsular extension: Absent

- Invasion of tissue adjacent to thyroid: Absent

- Margins: Negative

- Lymph nodes: No evidence of malignancy (Positive/Total): (0/3) (present in specimens A, B and D).

- Uninvolved gland: Unremarkable

- Parathyroid tissue: Present 4 fragments of parathyroid tissue are present in slides A4, A5, C1, C2.

- Correlation with FNA/cytology: Correlates with prior FNA diagnosis of suspicious for papillary carcinoma.
