ICD-O-3
Carcinoma, squamous cell NOS
8070/3
Site: Buccal mucosa
CO6.0
9/29/13

Collect date:

PATHOLOGY REPORT:

PRIMARY SITE: Buccal mucosa

1 - "Neck lymph nodes - Right":

- Eighteen lymph nodes with no evidence of metastatic carcinoma (0/18).
- Salivary gland fragments with congestion, uninvolved by neoplasia

2 - "Neck lymph nodes":

- Two of seven lymph nodes involved by metastatic carcinoma (2/7), with capsular involvement.

3 - Anterior margin uninvolved by neoplasia

4 - "Retromolar lesion surgical excision specimen":

- Poorly differentiated squamous cell carcinoma, ulcerated, measured 4.1 cm, 1.4 cm deep, with necrosis sites.
- Lymphovascular invasion: present.
- Perineural invasion: present.
- Osseous tissue involved by carcinoma.
- Intense peritumoral desmoplasia.
- Scarce peritumoral lymphocitary infiltrate.
- Deep margin involved by carcinoma.
- Other surgical margins uninvolved by carcinoma.
