For cases in which immunostains are performed, the following applies:

Appropriate internal and/or external positive and negative controls have been evaluated. Some of the immunohistochemical reagents used in this case may be classified as analyte specific reagents (ASR). These were developed and have performance characteristics determined by the Anatomic Pathology Department,

These reagents have not been cleared or approved by the US Food and Drug Administration (FDA). The FDA has determined that such clearance or approval is not necessary. These tests are used for clinical purposes. They should not be regarded as investigational or for research. This laboratory is certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA-88) as qualified to perform high complexity clinical laboratory testing.
