## SUPPLEMENTAL REPORT

### DIAGNOSIS:

- (A) TOTAL LARYNGECTOMY AND RIGHT LOBE THYROIDECTOMY:  
No cartilage involvement by tumor.

Entire report and diagnosis completed by: [REDACTED]

### DIAGNOSIS

- (A) TOTAL LARYNGECTOMY AND RIGHT LOBE THYROIDECTOMY:  
TOTAL LARYNGECTOMY:  
INVASIVE MODERATELY DIFFERENTIATED SQUAMOUS CELL CARCINOMA OF  
SUBGLOTTIS (2.0 CM) INVOLVING BOTH RIGHT AND LEFT  
SUBGLOTTIS, SURGICAL MARGINS FREE OF TUMOR.  
RIGHT LOBE OF THYROID:  
Colloid nodules, no tumor present.

Entire report and diagnosis completed by: [REDACTED]

### GROSS DESCRIPTION

- (A) TOTAL LARYNGECTOMY AND RIGHT LOBE THYROIDECTOMY - A total laryngectomy and right thyroidectomy with overall measurements of 7.5 x 4.0 x 3.5 cm. The subglottic lesion involving the midline and extending to the right and left subglottis is a light-tan, ulcerated and slightly indurated mass (2.0 x 1.5 x 0.4 cm). The lesion is entirely subglottic and does not appear to extend to the underlying cartilage. The right thyroid mass is 4.0 x 3.5 x 2.0 cm and shows multinodular goiter. The laryngeal mass is submitted entirely from right to left in A1-A9; A10-A12, representative sections of the thyroid nodule.
