**Clinical History**

Right neck cancer. Right base of tongue mass. Direct laryngoscopy with biopsy.

**Specimen(s) Received**

A: Right tonsil

B: Right tonsil

**Gross Description**

Specimen A is received fresh for intraoperative consultation, labeled with the patient's name, medical record number and as "right tonsil." It consists of multiple portions of soft tissue measuring 0.5 x 0.5 x 0.4 cm in aggregate. The specimen is submitted entirely for frozen section diagnosis, then transferred to cassette "A1FS." Dictated

Specimen B is received fresh, labeled with the patient's name, medical record number and as "right tonsil." It consists of a portion of mucosa-lined soft tissue measuring 0.6 x 0.4 x 0.3 cm. The specimen is bisected and submitted entirely in cassette "B1." Dictated by

**Intraoperative Consult Diagnosis**

A1FS: RIGHT TONSIL BIOPSY, (FROZEN SECTION): NON-KERATINIZING SQUAMOUS CELL CARCINOMA.  
Frozen section results were communicated to the surgical team and were repeated back by
