

SURGICAL PATHOLOGY

Case Number : [REDACTED]

Diagnosis:

A: Larynx, right aryepiglottic fold, biopsy

- Invasive moderate to poorly differentiated keratinizing squamous cell carcinoma.

B: Larynx, right pyriform sinus, biopsy

- Invasive moderate to poorly differentiated keratinizing squamous cell carcinoma.

Clinical History:

The patient is a [REDACTED] with T3N3M0 squamous cell carcinoma of the [REDACTED] ttic fold extending into the medial right pyriform sinus.

Gross Description:

Received are two appropriately labeled containers.

Specimen A:

SITE: Right aryepiglottic fold

METHOD: Biopsy

MEASURE: 1.7 x 0.9 x 0.3 cm

COMMENT: Aggr te of multiple friable pink/tan tissue fragments

BLOCK #: A1, [REDACTED]

Specimen B:

SITE: Right pyriform sinus

METHOD: Biopsy

MEASURE: 1.4 x 0.3 x 0.3 cm

COMMENT: Aggr ate of multiple red/tan tissue fragments

BLOCK#: B1, [REDACTED]

Light Microscopy:

Light microscopic examination is performed by [REDACTED]
