## GROSS DESCRIPTION

### PART #1: TOTAL THYROIDECTOMY

Dictated:

The specimen is received fresh labeled with the patient's name xxxx, and is designated total thyroidectomy. The specimen is oriented with a stitch on the left thyroid nodule. The specimen measures overall 5.5 x 4.5 x 1.5 cm, and weighs 14.49 grams. Orange ink is placed on the anterior aspect of the specimen, and black ink is placed on the posterior aspect. The specimen is serially sectioned to reveal a tumor measuring 2.4 x 1.8 x 1.5 cm in the left superior pole of the thyroid. A portion of this tumor is harvested for potential future studies. The specimen is serially sectioned and no other lesions are identified. The specimen is entirely submitted.
