

ICD-0-3

Carcinoma, infiltrating lobular, NOS 8520/3

Path Site: Breast, central C50.1 1/19/11 bw
cQCF Site: Breast, portion NOS C50.9

Diagnosis:

1. Invasive lobular breast carcinoma in the classical differentiation variant (G II) with extensive infiltration of the skin but no ulceration of the skin (tumor diameter 3 cm, minimum distance from dorsal resection margin 2.5 cm).

Summary tumor classification: invasive lobular breast carcinoma, G II, pT2pN0(0/10)L0V0R0, positive for estrogen and progesterone receptors, negative for C-erb B-2 oncogene.

Follow-up finding:

(three times) A metastatic infiltration and also an influx of individual cells of the invasive lobular breast carcinoma into the excised axillary lymph node is definitely excluded. The pN0 status is thus confirmed
