ADM DATE:

PROCEDURE: SPHS

OPER DATE:

Patient was hospitalized in [REDACTED] for a hypertensive episode as well as hypokalemia. A CT showed a left adrenal mass measuring 6.2 x 4.0 cm. She states she is currently easily fatigued. Clinical Diagnosis: Left adrenal mass. Operative Procedure/Tissue Submitted: Left open adrenalectomy.

PROCEDURE: SPGD

1. "Left adrenal gland." Received in formalin in a medium container is a 105 gram, excisional specimen of a nodular gray-tan adrenal gland with a thin rim of surrounding periadrenal fat, measuring 9 x 6.8 x 4.3 cm. The specimen has been previously inked blue and sectioned for tissue procurement. No orientation is given. The remainder of specimen is inked blue, specimen is serially sectioned to reveal a diffusely pink-gray, soft, nodular mass, with smooth cut surface, arising from within a yellow/partially cystic adrenal, with majority of lesion outside, and a residual of normal yellow adrenal, 3.0 cm on one edge of mass. The periadrenal fat appears to be not involved. The lesion is, otherwise, well-circumscribed with a thin, clear membrane overlying. The specimen is submitted as follows:
 - 1A. Normal adrenal to tumor.
 - 1B. Cystically dilated area of adrenal, involved with lesion.
 - 1C. Representative section of the mass.
 - 1D. Additional sections of mass.
 - 1E. Additional cystically dilated adrenal.
 - 1F. Additional tumor to adrenal and periadrenal adipose tissue.
 1ADDA-1ADDG. Additional sections of tumor to capsule.
(NOTE: 1E-1G. Thin membrane of capsule slips and might not be represented).

PROCEDURE: SPMI

ADRENOCORTICAL CARCINOMA

Tumor Size: 9 x 6.3 x 4.3 cm.

Tumor Weight: 105 grams.

Capsular Invasion: Present focally.

Vascular Invasion: Negative.

Surgical Margins: Close.

ICD-O-3

Carcinoma, adrenal cortical 8370/3
 Site: Adrenal Gland, Cortex C74.6

Necrosis: Present.

Mitotic Rate: 8 / 50.

Grade: Low.

Lymph node status: N.A.

Extra-adrenal Extension: Negative.

Stage: **pt2NxMx**

Number of fields reviewed: 25.

Mitotic figures: 4

PROCEDURE: SPDX

1. Left adrenal gland, resection: Adrenocortical carcinoma. Capsule invasion is present focally, with margins close.

[REDACTED] the signing staff pathologist, have personally examined and interpreted the slides from this case.
