copy No. 3

Date: [REDACTED]

Examination: Histopathological examination

Internal invoice No.

Cost of diagnostic procedure

Examination No. [REDACTED]

Patient: XXX

PESEL: XXX

Age: [REDACTED] Gender: M

Material: **Lesion resection – larynx**

Unit in charge: [REDACTED]

Physician in charge: [REDACTED]

Material collected on: [REDACTED] Material received on: [REDACTED]

Expected time of examination: [REDACTED]

Clinical diagnosis: **Tumour of the larynx (Clinically: circular proliferation covering 2/3 of the front part of both vocal folds, both laryngeal vestibules and anterior commissure.)**

Examination performed on: [REDACTED]

Macroscopic description:

Surgical specimen sized 9.5 x 5 x 5.5 cm containing the larynx, hyoid bone and a 1 cm length of the trachea.

Tumour sized 3.8 x 2.1 x 2.6 cm in the supraglottal and subglottal region infiltrating into the infrathyroid region.

Microscopic description:

Carcinoma planoepitheliae keratodes invasorum G2.

The tumour spreads over all levels of the larynx, thyroid cartilage and an adjacent small part of the thyroid.

Surgical incision lines free of neoplastic proliferation. Minimal margin (front): below 0.1 cm.

Histopathological diagnosis:

Carcinoma planoepitheliae keratodes invasivum laryngis. Invasive keratinized squamous carcinoma of the larynx. G2, pT4a.

Compliance validated by: [REDACTED]
