SP FINAL REPORT			Source:

HISTORY:

Ten-month history of right neck mass. Had a DL which showed asymmetrical enlargement of right tongue base and vallecula. Biopsies were positive for squamous cell carcinoma. Operative Procedure/Tissue Submitted: DLE and biopsy.

GROSS:

1. "Right base of tongue" Received in formalin in a small container is a 0.7 cm tan-pink mucosal bit. Bisected. (2ns)

MICROSCOPIC DIAGNOSIS:

1. Right base of tongue, biopsy: Invasive, non-keratinizing, poorly-differentiated squamous cell carcinoma.

I, [REDACTED] the signing staff pathologist, have personally examined and interpreted the slides from this case.
