ICD-O-3

Carcinoma, squamous cell NOS
8020/3

Site Hypopharynx NOS
C13.9
q12413

Collect date:

PATHOLOGY REPORT:

PRIMARY SITE: Hypopharynx

1 - "Right hypopharynx biopsy":

- Moderately differentiated squamous cell carcinoma.

2 - "Left-inferior parathyroid site":

- Fragment of fibroadipose tissue uninvolved by neoplasia.

3 - "Left recorrential dissection specimen":

- Two of nine lymph nodes involved by metastatic carcinoma (2/9), without capsular involvement.

5 - "Total pharyngolaryngectomy, partial esophagectomy, left neck dissection and right radical neck dissection with total thyroidectomy":

- Moderately differentiated squamous cell carcinoma of the hypopharynx.

- Epiglottis: uninvolved by neoplasia.

- Left vocal cord: uninvolved by neoplasia.

- Right vocal cord: involved by neoplasia.

- Thyroid, cricoid and arytenoid cartilages uninvolved by neoplasia.

- Hyoid bone uninvolved by neoplasia.

- Surgical margins uninvolved by neoplasia, but right-posterior and right-lateral are exiguous (measured 1.0 mm).

- Esophagus involved by neoplasia with uninvolved surgical margins.

- Thyroid gland with follicular papillary carcinoma, histological grade 2, with uninvolved margins.

- Tumor size: 1.2 cm

- Lymphovascular invasion: not identified.

- Right neck dissection:

- Three of fifteen lymph nodes involved by metastatic carcinoma (3/15), without capsular involvement.

- Left neck dissection:

- Four lymph nodes uninvolved by metastatic carcinoma (0/4).

5 - "Hypopharynx margin":

- Uninvolved by neoplasia.

Addendum:
Absence of neoplasia invasion on hyoid bone.
