## SPECIMEN ID:

- A. LYMPH NODE - RIGHT NECK LEVEL 3,4, B. LYMPH NODE - RIGHT NECK LEVEL 1,
- C. LYMPH NODE - RIGHT NECK LEVEL2, D. LYMPH NODE - ADD'S RT LEVEL 4 TISSUE,
- E. TONGUE - RT GLOSSECTOMY STITCH ANTERIOR FS, F. TONGUE - DORSAL TONGUE FS,
- G. NERVE - PROXIMAL MARGIN RIGHT LINGUAL NERVE FS, H. TONGUE - RIGHT BASE OF TONGUE FS,
- I. TONSIL - RT ANTERIOR TONSILLAR PILLAR FS, J. MOUTH - RETRO-MOLAR TRIGONE FS,
- K. MOUTH - RT FLOOR OF MOUTH FS, L. TONGUE - VENTRAL TONGUE FS,
- M. TONGUE - DEEP MARGIN BASE OF TONGUE FS, N. TONGUE - DEEP MARGIN ANTERIOR FS,
- O. TONGUE - DEEP MARGIN-DEEP TONGUE FS, P. LYMPH NODE - LEVEL 5 LYMPH NODE FS,
- Q. MOUTH - DISTAL RIGHT HYPOGLOSSAL FS, R. MOUTH - SUBMENTAL TRIANGLE

## \*\*\* FINAL DIAGNOSIS \*\*\*

## A. RIGHT NECK LEVEL 3,4:

METASTATIC CARCINOMA to two of nineteen lymph nodes (2/23).

Largest focus of carcinoma is 3.0 mm.

Extranodal extension is absent.

## B. RIGHT NECK LEVEL 1:

METASTATIC CARCINOMA to one of five lymph nodes (1/5).

Largest focus of carcinoma is 0.9 cm.

Extranodal extension is present.

 If you receive this report inadvertently, please call [REDACTED] and  
 return the report to us by mail.

ICD-O-3  
 Carcinoma, squamous cell  
 keratinizing NOS 8071/3  
 Site Tongue NOS C02.9  
 JWD 5/14/13

\*\*\* FINAL DIAGNOSIS \*\*\* (Continued)

C. RIGHT NECK LEVEL 2:

METASTATIC CARCINOMA to one of thirteen lymph nodes (1/13).  
Largest focus of carcinoma is 1.2 cm.  
Extranodal extension is present.

D. ADDITIONAL RIGHT LEVEL 4 TISSUE:

One lymph node, negative for carcinoma (0/1).

E. RIGHT GLOSSECTOMY:

INVASIVE KERATINIZING SQUAMOUS CELL CARCINOMA, ulcerating, 4.1 cm in greatest dimension.  
Surgical resection margins are negative.

Closest proximally is 5 mm from anterior resection margin.

Perineural invasion is present.

No definitive lymphovascular invasion is identified.

AJCC Classification (7th edition): pT3 N2b MX

See Tumor Summary.

F. DORSAL TONGUE:

Squamous mucosa and skeletal muscle, negative for carcinoma.

G. PROXIMAL MARGIN RIGHT LINGUAL NERVE:

return the report to us by mail. [REDACTED]

(Continued)

\*\*\* FINAL DIAGNOSIS \*\*\* (Continued)

Nerve, negative for carcinoma.

H. RIGHT BASE OF TONGUE:

Squamous mucosa, negative for carcinoma.

I. RIGHT ANTERIOR TONSILLAR PILLAR:

Squamous mucosa, negative for carcinoma.

J. RETRO-MOLAR TRIGONE:

Squamous mucosa, negative for carcinoma.

K. RIGHT FLOOR OF MOUTH:

Squamous mucosa, negative for carcinoma.

L. VENTRAL TONGUE:

Skeletal muscle and connective tissue, negative for carcinoma.

M. DEEP MARGIN BASE OF TONGUE:

Skeletal muscle and connective tissue, negative for carcinoma.

N. DEEP MARGIN ANTERIOR:

Fibroadipose tissue, negative for carcinoma.

This report is privileged, confidential and exempt from disclosure under applicable law.

return the report to us by mail. [REDACTED]

(Continued)

**\*\*\* FINAL DIAGNOSIS \*\*\* (Continued)****O. DEEP MARGIN DEEP TONGUE:**

Fibroadipose tissue, negative for carcinoma.

**P. LEVEL 5 LYMPH NODE:**

One lymph node, negative for carcinoma (0/1).

**Q. DISTAL RIGHT HYPOGLOSSAL:**

Nerve, negative for carcinoma.

**R. SUBMENTAL TRIANGLE:**

Five lymph nodes, negative for carcinoma (0/5).

**Surgical Pathology Cancer Case Summary:****LIP AND ORAL CAVITY: Incisional Biopsy, Excisional Biopsy, Resection****Specimen:**

Dorsal surface of tongue, NOS

Anterior two-thirds of tongue, NOS per clinical notes

**Received: In formalin****Procedure: Resection**

Glossectomy (specify): Hemiglossectomy

**Specimen Integrity: Intact****Specimen Size:**

Greatest dimensions: 6.1 x 4.1 x 3.6 cm

**Specimen Laterality: Right**

Tumor Site: Anterior two-thirds of tongue, NOS

Tumor Size: Greatest dimension: 4.1 cm

Additional dimensions: 3.1 x 0.2 cm

Tumor Description: Ulcerated

Histologic Type: Squamous cell carcinoma, conventional

return the report to us by mail. [REDACTED]

(Continued)

**\*\*\* FINAL DIAGNOSIS \*\*\* (Continued)**

Histologic Grade: G2: Moderately differentiated  
Margins: Uninvolved by invasive carcinoma:

Distance from closest margin: 0.5 cm

Specify margin(s), per orientation, if possible: Anterior

Lymph-Vascular Invasion: Not identified

Perineural Invasion: Present

Lymph Nodes, Extranodal Extension: Present

Pathologic Staging:

Primary Tumor: pT3

Regional Lymph Nodes: pN2b

Number of Lymph Nodes Examined: 44

Number of Lymph Nodes Involved: 4

Distant Metastasis: Not applicable

  
**CLINICAL HISTORY-**

PRE-OP DX: NONE PROVIDED

PROCEDURE: NONE PROVIDED

RELEVANT CLINICAL HX: NONE PROVIDED

**GROSS DESCRIPTION:**

- A. Received in formalin labeled "Right neck level 3&4" consists of an unoriented portion of fibroadipose tissue 6.2 x 2.1 x 1.4 cm. Sixteen possible lymph nodes are identified. The largest of which 0.6 cm in greatest dimension. Cassettes are submitted as follows:

Cassettes #1-3 Four lymph nodes per cassette

Cassettes #4&5 Three lymph nodes per cassette

Cassettes #6-8 Indurated fatty tissue

- B. Received in formalin labeled "Right neck level 1" is a portion of fibrofatty tissue 4.1 x 2.3 x 1.2 cm. One grossly positive lymph node is identified which measures 1.1 cm in greatest dimension. Four other lymph nodes are identified. Portion of salivary gland is present 3.1 x 2.1 x 1.1 cm. Cassettes are submitted as follows:

Cassette #1 Grossly positive lymph node, bisected and submitted in toto in one

**GROSS DESCRIPTION:** (Continued)

## cassette

Cassette #2 Three possible lymph nodes

Cassette #3 One lymph node

Cassettes #4&amp;5 Resection of salivary gland

- C. Received in formalin labeled "Right neck level 2" is an unoriented portion of fibrofatty tissue  $4.9 \times 3.6 \times 4.5$  cm. One grossly positive lymph node is identified  $2.2 \times 1.5 \times 1.1$  cm. No other lymph nodes are identified. Cassettes are submitted as follows:

Cassettes #1-4 Large lymph node, submitted in toto and multisected  
Cassettes #5&6 Sections of indurated fatty tissue

- D. Received in formalin labeled "Additional right level 4 tissue" consists of a portion of gray-tan tissue  $0.7 \times 0.4 \times 0.3$  cm. Submitted in toto in one cassette.

- E. Received is a "Partial glossectomy specimen" measuring 6.1 cm from the anterior to posterior, 4.1 cm from superior to inferior and 3.6 cm from lateral to lateral. The margins are oriented as follows:

Yellow is anterior

Red is medial

Black is posterior

Ulcerated tumor is present  $4.1 \times 3.1$  cm in diameter. The lesion is 0.5 cm from the anterior margin. 0.6 cm from the posterior resection margin, and 3mm from the medial margin. The depth of the lesion upon sectioning is 0.7 cm. Cassettes are submitted as follows:

Cassette #1 Perpendicular anterior margin

Cassette #2 Perpendicular posterior margin

Cassettes#3-9 Sections of lesion in relation to medial margin

- F. Received fresh for frozen section labeled "Dorsal tongue" are multiple portions of red-tan tissue  $2.1 \times 1.1 \times 0.3$  cm in aggregate. Submitted in toto in one cassette.

- G. Received fresh for frozen section labeled "Proximal margin right lingual nerve" is a portion of red-tan tissue  $0.6 \times 0.5 \times 0.3$  cm. Submitted in toto in one cassette.

- H. Received fresh for frozen section labeled "Right base of tongue" is a portion of red-tan tissue  $1.9 \times 0.4 \times 0.3$  cm. Submitted in toto in one cassette for frozen

**GROSS DESCRIPTION: (Continued)**  
section.

- I. Received fresh for frozen section labeled "Right anterior tonsillar pillar" is a portion of red-tan tissue  $0.4 \times 0.4 \times 0.3$  cm. Submitted in toto in one cassette for frozen section.
- J. Received in formalin labeled "Retromolar trigone" is a portion of red-tan tissue  $1.2 \times 0.3 \times 0.3$  cm. Submitted in toto in one cassette for frozen section.
- K. Received in formalin labeled "Right floor of mouth" is a portion of red-tan tissue  $1.5 \times 0.4 \times 0.3$  cm in greatest dimension. Submitted in toto in one cassette for frozen section.
- L. Received fresh for frozen section labeled "Ventral tongue" are multiple portions of red-tan tissue  $1.1 \times 0.4 \times 0.3$  cm. Submitted in toto in one cassette for frozen section.
- M. Received fresh for frozen section labeled "Deep margin base of tongue" is a portion of red-tan tissue  $0.6 \times 0.5 \times 0.3$  cm. Submitted in toto in one cassette for frozen section.
- N. Received fresh for frozen section labeled "Deep margin anterior" is a portion of red-tan tissue  $0.5 \times 0.4 \times 0.3$  cm. Submitted in toto in one cassette for frozen section.
- O. Received in formalin labeled "Deep margin-deep tongue" is a portion of red-tan tissue  $0.5 \times 0.4 \times 0.3$  cm. Submitted in toto in one cassette for frozen section.
- P. Received fresh for frozen section labeled "Level V lymph node" is a portion of fatty tissue  $2.6 \times 1.5 \times 0.3$  cm. One minute lymph node is identified. Possible lymph nodes identified  $0.2 \times 0.2 \times 0.1$  cm. The lymph node is bisected. The touch prep is taken and submitted in toto in one cassette for frozen section. Remaining tissue is submitted in toto for permanent section.
- Q. Received in formalin labeled "Distal right hypoglossal" is a portion of red-tan tissue  $0.5 \times 0.3 \times 0.2$  cm. Submitted in toto in one cassette for frozen section.
- R. Received in formalin labeled "Submental triangle" is a portion of fibrofatty tissue  $3.1 \times 1.5 \times 1.1$  cm. Three possible lymph nodes are identified. Largest of which measures 0.6 cm in diameter. The specimen is submitted in toto as follows:
