Case Clinical Information

RIGHT RENAL MASS

Gross Description

Received in formalin labeled with the patient's name and "right renal mass NFS" is a previously inked and serially sectioned partial nephrectomy specimen measuring 4 x 3 x 2.8 cm. The parenchymal margin has been inked black and the capsule margin blue. The cut surface is remarkable for a 3.8 cm, well-defined nodule lined by a thin capsule, consistent with renal cell carcinoma. The margins grossly appear uninvolved.
