## Translation of pathology report F

Sample

### Gross Pathology

Cryofixated specimen with a weight of

### Microscopic pathology

The H&E stained slide at hand shows an epitheloid malignant tumor with sparse amount of connective tissue. The tumor constitute approx. 85 percent of the tissue. The tumor cells show round to oval nuclei with granular chromatin. There is a high nucleo/cytoplasmatic ratio. The mitotic count is 11 mitoses per square millimetre. The tumor cells have a middle sized cytoplasm. The tumor shows a sheet like growth pattern. Lymphocytic infiltrates compound approx. 5 percent of the tissue cells. The tumor harbours approx. 10 percent of necrotic tissue.

**Diagnosis:** Parts of a malignant tumor, consistent with a metastasis of a melanoma.
