Final Surgical Pathology Report

Procedure: [REDACTED]

Diagnosis

- A. Right kidney, partial resection:  
Papillary renal cell carcinoma, 2.7 cm, margins negative but close.
- B. Right kidney, deep margin, biopsy:  
No carcinoma identified.

Microscopic Description:

Microscopic examination performed:

A.

Type: Papillary carcinoma  
Histologic grade (Fuhrman Nuclear Grade: 3  
Primary tumor (pT): 2.7 cm, pT1  
Margins of resection: negative but close, < 1mm  
Regional lymph nodes (pN): none submitted  
Distant metastasis (pM: cannot be evaluated by this specimen  
Vascular invasion: not identified  
Non-neoplastic kidney: unremarkable  
Other findings: none

B. Sections of the deep margin show no evidence of malignancy.

Specimen

- A. Right renal mass
- B. Right kidney, deep margin

Clinical Information

Right renal mass

Intraoperative Consultation

right kidney, deep margin, biopsy: No malignancy identified

[REDACTED]

Gross Description

- A. Received is a container labeled with the patient's name, medical record number and "right renal mass". The specimen consists of a circumscribed piece of tan-brown tissue measuring 2.8 x 3.1 x 2.5 cm. The surgical margin is inked black the specimen is serially sectioned. On the entire specimen is occupied by a circumscribed lesion which is yellow-brown and necrotic. A thin fibrous capsule and nests the cystic mass. The entire specimen is submitted in A1 to A5.
- B. Container B. is labeled with the patient's name, medical record number and "deep margin". The specimen consists of a single piece of tissue measuring 0.6-0.6 x 0.3 cm. All submitted in BFS.
